

The Fascinating Journey of Gold Prices: From 1969 to 2019

272.08%

Gold price increasement from 1977 to 1980.

121.40%

Gold price increasement form 2006 to 2010.

Suma de Price para cada Date.

Reasons for gold increasement in 1980:

- High inflation and economic volatility.
- Expansive monetary policies leading to dollar depreciation and investor movement towards gold.
- Geopolitical instability (cold war, ...)increased global uncertainty and gold demand.
- Investor interest and speculation surged due to economic and political instability in the 1980s, boosting gold prices.

Reasons for gold increasement around 2010:

- Economic and financial uncertainty post-2008 crisis led investors to seek safe-haven assets like gold.
- Expansionary monetary policies, driving demand for gold as a hedge.
- Prolonged weakness of the US dollar boosted international demand for gold as an alternative store of value.
- Growing economic activity in countries like China and India increased demand for gold
